

## **MEDIUM VOLTAGE SWITCHGEAR SAFETY USING GLOW TUBES**

MV POWER Switchgear Glow Tubes are neon-filled glass tubes designed for stationary use in the Medium Voltage switchgear, on the phase bus bars and cable entry points.

Glow Tubes are a quick and cost-effective way to show:

- HIGH VOLTAGE PRESENCE;
- LOSS OF PHASE;

**WARNING: GLOW TUBES CAN NEVER BE USED AS A SOLE DEVICE TO CONFIRM VOLTAGE PRESENCE. OTHER DEVICES ARE NEEDED TO VERIFY PRESENCE OF THE VOLTAGE ON THE BUSBARS/CABLES. BUS BARS MAY NOT BE DEAD IF GLOW TUBES ARE NOT LIT!**

At MV POWER “SAFETY” is the magic word. Our Glow Tube Switchgear Lamps will help you to satisfy OSHA mandated Hazardous Energy Control requirements!

We have Medium Voltage Solutions! Please contact us for your Glow Tube Switchgear Lamp needs.

Committed to servicing you,

Aleksandar Buntic, BSEE
